Increasing the Rigor of LEARNING-FOCUSED Lessons MicroPD Course 5
Higher Order Thinking Processes: As You Learn, Organize Key Points

You have already brainstormed several ideas about what a process is and why it is important. Add your ideas to the organizer under the idea column. As you learn more about the Higher Order Thinking Processes, use the organizer to help you generate additional ideas about their importance, and why you must plan and explicitly teach them during Lesson Instruction. Ideas will be placed into categories at the end of the course.
